

Project “INVENT” (Intelligent Electric Vehicle Integration)

Electric vehicle owners at UC San Diego have an opportunity to participate in an electric vehicle (EV) charging research project. Signup starts immediately!

PROJECT GOAL

To demonstrate the real-world benefits of advanced Vehicle-Grid Integration (VGI) applications for electric vehicles. This full-scale demonstration will include up to 50 EVs at the UC San Diego campus.

BE A PART OF THE “SHARING ECONOMY”

Similar to Airbnb and Uber “sharing” models, this program will demonstrate that owners can share their EV batteries when not needed (e.g., when _{parked} and sufficiently charged) and as compensation, receive valuable incentives.

BENEFITS OF PARTICIPATING INCLUDE:

- Free charging on the UC San Diego campus
- Dedicated parking spaces

If you are interested in participating, please complete the [online survey](#).

MORE INFORMATION

To learn more about this program and how you can participate, contact: Kevin Norris, UC San Diego Facilities Management knorris@ucsd.edu or (858) 967-2363
